

VARIO M3

VARIO M3 cabinet system is a comprehensive, economical storage space program with three different depths of 428, 495 or 600 mm.

From 1 to 6 OH, this modular system allows for ever new combinations and then blends into a convincing whole. The equipment with fabric-covered visible rear panels, sound-absorbing fronts and a multitude of sophisticated features round off this program.

Whether open, with drawers, with hinged doors, transverse roller shutters or sliding doors - the VARIO M3 cabinet system stands for design diversity and formal unity.

M3 is a carcass cabinet system with different front variants and a uniform height grid of 370 mm per file height. The sides are located between the top shelf and the bottom shelf. All cabinets are equipped with a grooved 16 mm thick visible rear panel. Different bottom groups guarantee easy height compensation and can also be a design element.

Modern handle strips, a recessed joint pattern, soft-closing of the hinged doors and other technical details make the M3 cabinets one of the best thought-out and most clearly designed storage systems on the market. Also the equipment leaves hardly any wishes unfulfilled: Wooden or steel shelf, hanging pull-out, small pull-out insert, pull-out clothes rail, card index lanes and differentiated compartment division.

The VARIO M3 transverse roller shutter cabinet with

Hinged door cabinet

width 400, 600, 800, 1000, 1200 mm

depth 428, 495, 600 mm

height 1 - 6 BH

Transverse roller shutter cabinet

width 800, 1000 mm (up to 6 BH)

width 1200 mm (up to 5 BH)

width 1600 mm (up to 3 OH) with middle wall

depth 428, 495 mm

height 1 - 6 BH

Sliding door cabinet

width 800, 1000, 1200, 1600 mm (1200, 1600 mm with middle wall)

depth 428, 495, 600 mm

height 1- 3 OH up to width 1600 mm

height 1- 4 OH up to width 1200 mm

maximum storage space utilization is excellently suited for the zoning of large office units due to its minimal space consumption. The restrained design corresponds well with an architectural environment.

Optionally, the rear walls and roller shutter elements can be equipped with sound-absorbing features. In this way, the VARIO M3 cabinet system contributes to a reduction in construction costs in the acoustically effective equipping of buildings. More information on acoustic equipment in our AKUSTIK brochure in the download area.
