

VARIO PET PORT

With its visually and haptically soft felt surface, the VARIO PET PORT wall system brings a pleasant atmosphere to the office environment.

Due to the open structure of the surface, the wall elements are acoustically effective and at the same time pinable.

The PET PORT privacy screens can be retrofitted to all table tops with a thickness of 19-25 mm using the PET PORT clamp. For the VARIO table systems STAGE, STAGE SX, ICON and CHANGE, the privacy screens can also be attached via cable outlet boxes.

Free-standing PET PORT partition walls can be used to create zones, areas and paths - even on a temporary basis. The 40 mm thick PET fleece walls are light and stable and allow easy, flexible handling.

PET PORT elements can also be used as sound-absorbing wall or suspended panels. The sandwich construction of compressed PET fleece with an internal paper honeycomb core achieves an acoustic effectiveness of absorber class B - with a wall thickness of 40 mm. More information on acoustic equipment in our AKUSTIK brochure in the download area.

Screens:

Heights 410 / 700 mm

Widths 770 / 1600 / 1800 mm (700 mm only in height 410 mm)

Partition walls:

heights 1600 / 1800 mm

widths 410 / 700 mm

Acoustic panel formats:

770 x 410 mm

1600 x 410 mm

1800 x 410 mm

1600 x 700 mm,

1800 x 700 mm

Design: Prof. Klaus Michel (2015)

Equipment

Table top clamp for 19-25 mm tops

Mounting to STAGE SX

Base plate at width 410 mm

Double foot stabilizer at width 700 mm
