

VARIO EDGE

The EDGE partition wall system enables the temporary creation of individual work situations in large rooms.

Actively modulate work landscapes, constantly restructure spaces and create connections and retreats where they are needed - the new VARIO EDGE mobile wall system is a multi-talent that creates freedom. EDGE structures rooms, is highly acoustically effective and thus facilitates relaxed communication.

Functional add-ons such as screen holders, whiteboards, coat hooks and shelving elements make the walls a changeable tool and perfect assistant for modern ways of working - whether hybrid meetings, teamwork or personal workspace.

Freely positionable, window-like openings that can be equipped with shelves, plant inserts and pinboards make the walls airy and create views in and out, storage space and room for documents and personal items. Visual spaces and connections to the areas behind the wall are created. Like a picture frame, the open segment sets the scene for the things housed there or the space behind.

At the same time, EDGE is the modern version of a TV cart. Equipped with a large screen and video technology, the mobile wall shows its full strength: As a platform for communication, both in face-to-face and online meetings, and thanks to its lightweight construction, it can be moved quickly and easily to wherever it is needed.

Small wall

Width 1500 mm

Depth 80 mm (540 mm incl. feet)

Height 1800 mm (1900 mm incl. double foot stabiliser with castors)

6 panels (2x3) à 750 x 600 mm

Large wall

Width 2250 mm

Depth 80 mm (540 mm incl. feet)

Height 1800 mm (1900 mm incl. double foot stabiliser with castors)

9 fields (3x3) à 750 x 600 mm

Awards:

VARIO EDGE was awarded the German Design Award Special Mention 2024 by the German Design Council. The Association of Interior Designers has awarded VARIO EDGE with the bdia ausgeschrieben! 2023 award.

Design: Bernd Benninghoff

The built-in frames are made of high-quality veneered oak in a natural tone or in black. The outer edge of the wall is also finished in matching oak veneer.

The detailed acoustic test report for EDGE and our ACOUSTICS brochure can be found in the download area.
