

# VARIO CONCLUSION

The CONCLUSION group workstation creates micro-architecture in large areas without structural interventions.

With CONCLUSION, double workstations can be configured in the same way as multiple workstations, which can be linked very well in a linear fashion. The power and data supply and the associated cables are easy to manage and invisible thanks to CONCLUSION's design. The work tables can be individually divided with corresponding wall attachments: in this way, screened areas or open vis-à-vis situations can be created. The 50 mm thick side panels and wall attachments can also be equipped with micro-perforated surfaces or with sound-absorbing fabric covering and absorb disturbing sounds and noise. More information on acoustic equipment in our AKUSTIK brochure in the download area. A sliding mechanism of the worktop for easy handling of cables, as well as the individual adjustment of the working height, the integration of work lights and attachments such as CPU holders are further guarantees for a comfortable workplace.
