VARIO FRAME Sit-Stand Desk

The quiet turbo among sit-stand desks
FRAME with rapid height adjustment of 80 mm/sec as standard

The FRAME sit-stand desk is the quiet powerhouse among height-adjustable desks. With its exceptionally high speed of 80 mm per second for height adjustment, it allows for a particularly quick and comfortable switch between sitting and standing positions. At the same time, the operating noise (< 42 dB) remains pleasantly quiet – ideal for focused work in the office or when working from home.

The height adjustment range of 650–1300 mm offers generous flexibility and is suitable for a wide variety of body heights and work requirements.

For even greater quietness, the speed can be optionally reduced, further minimising noise levels. The modern, high-quality column technology ensures stability and smooth, reliable movement.

The electronics also impress with their high robustness and low susceptibility to faults, ensuring long-term, trouble-free use. The overall package is rounded off by a particularly user-friendly and precise hand control, which makes operation intuitive and comfortable.

Key facts at a glance:

Tabletop

- Tabletop thickness: 19 and 25 mm, chipboard core with PP edging (choice of finishes)
- Tabletop corners: square 90°
- Available only with a fixed tabletop (no sliding tabletop)
- Tabletop width: 1600 or 1800 mm
- Tabletop depth: 800 or 900 mm

Base

- T-leg base / Bottom-Up columns

Columns

- Electric height adjustment: 650 – 1300 mm (3-section)
- Rapid height adjustment with a lifting speed of 80 mm/sec
- Speed adjustable via programming, making it even quieter at lower speeds
- Minimal power consumption in standby mode, ≤ 0.1 watts.
- Noise level < 42 dB
- Dynamic frame load: 80 kg
